

# Vacancy: Global Logistics Manager

**Location:** Hale **Salary:** £30,000 - £35,000 + Benefits

## Role Profile

Are you looking for a fantastic new opportunity to join a rapidly expanding VMS business, with an ever growing team based in Hale? A role where you will play an integral part in ensuring Logistics and Supply Chain functions run smoothly?

## If so, this role could be for you!

Cast UK are working in partnership with HTC Health, recruiting this Global Logistics Manager role based in Hale. The successful candidate will manage a two-person Logistics team. Logistics is an essential part of supply chain management, dealing with transportation of goods, warehousing, stock control and management

## What does the role involve?

If you have worked in Logistics previously, you will understand how essential this role is to Supply Chain Management.

You will oversee the entire process of shipment after PO placement, to acquisition of product, into company hands and through to final delivery to customers. You will liaison with suppliers, plus monitor production and delivery. Additionally, you will ensure safe and efficient transportation, storage and distribution of products.

Another part of this job is to Manage documentation control and plan and implement logistics strategy to ensure targets are met. The role will involve reporting, where you will take ownership of the company Stockholding report.

This role will further require you to manage company landed cost files and ensure that Sage X3 contains the most up to date accurate data. You will ensure that stock GRN's are creating correct accruals in Sage X3, working closely with finance to resolve any issues. Finally, you will manage and motivate team members.

## So... what's in it for you?

Opportunity to join a rapidly expanding VMS business, with an ever growing team based in Hale. You will play an integral part in ensuring HTC's Logistics and Supply Chain function runs smoothly.

Logistics handles various tasks, including goods delivery, stock and inventory management, packaging, etc. You will have the opportunity to build a professional logistic department to benefit from lower costs, higher production rates, efficient storage space usage, enhanced customer experience, and flawless inventory management.

What are we looking for?

## What are we looking for?

Ideally you have previous experience in a Logistics, Supply Chain or Import/Export role, organisational skills and the ability to handle large amounts of data. Additionally, experience in using the SAGE system would be advantageous, as well as knowledge of overseeing a full end to end Import/Export process, including Stock Movement and Allocation.

## Remuneration

£30,000-£35,000 +Benefits
